

Synthetic Natural Gas (SNG)

The alternative for CO₂ emission reduction in the future!

Without SNG?

Targets for 2020: 20 %
Targets for 2050: 60-80%
Costs above 150 €/ton not acceptable?

CO₂ reduction potential (without SNG) limited to 35% !!!

This Includes:

Road pricing

Windenergy

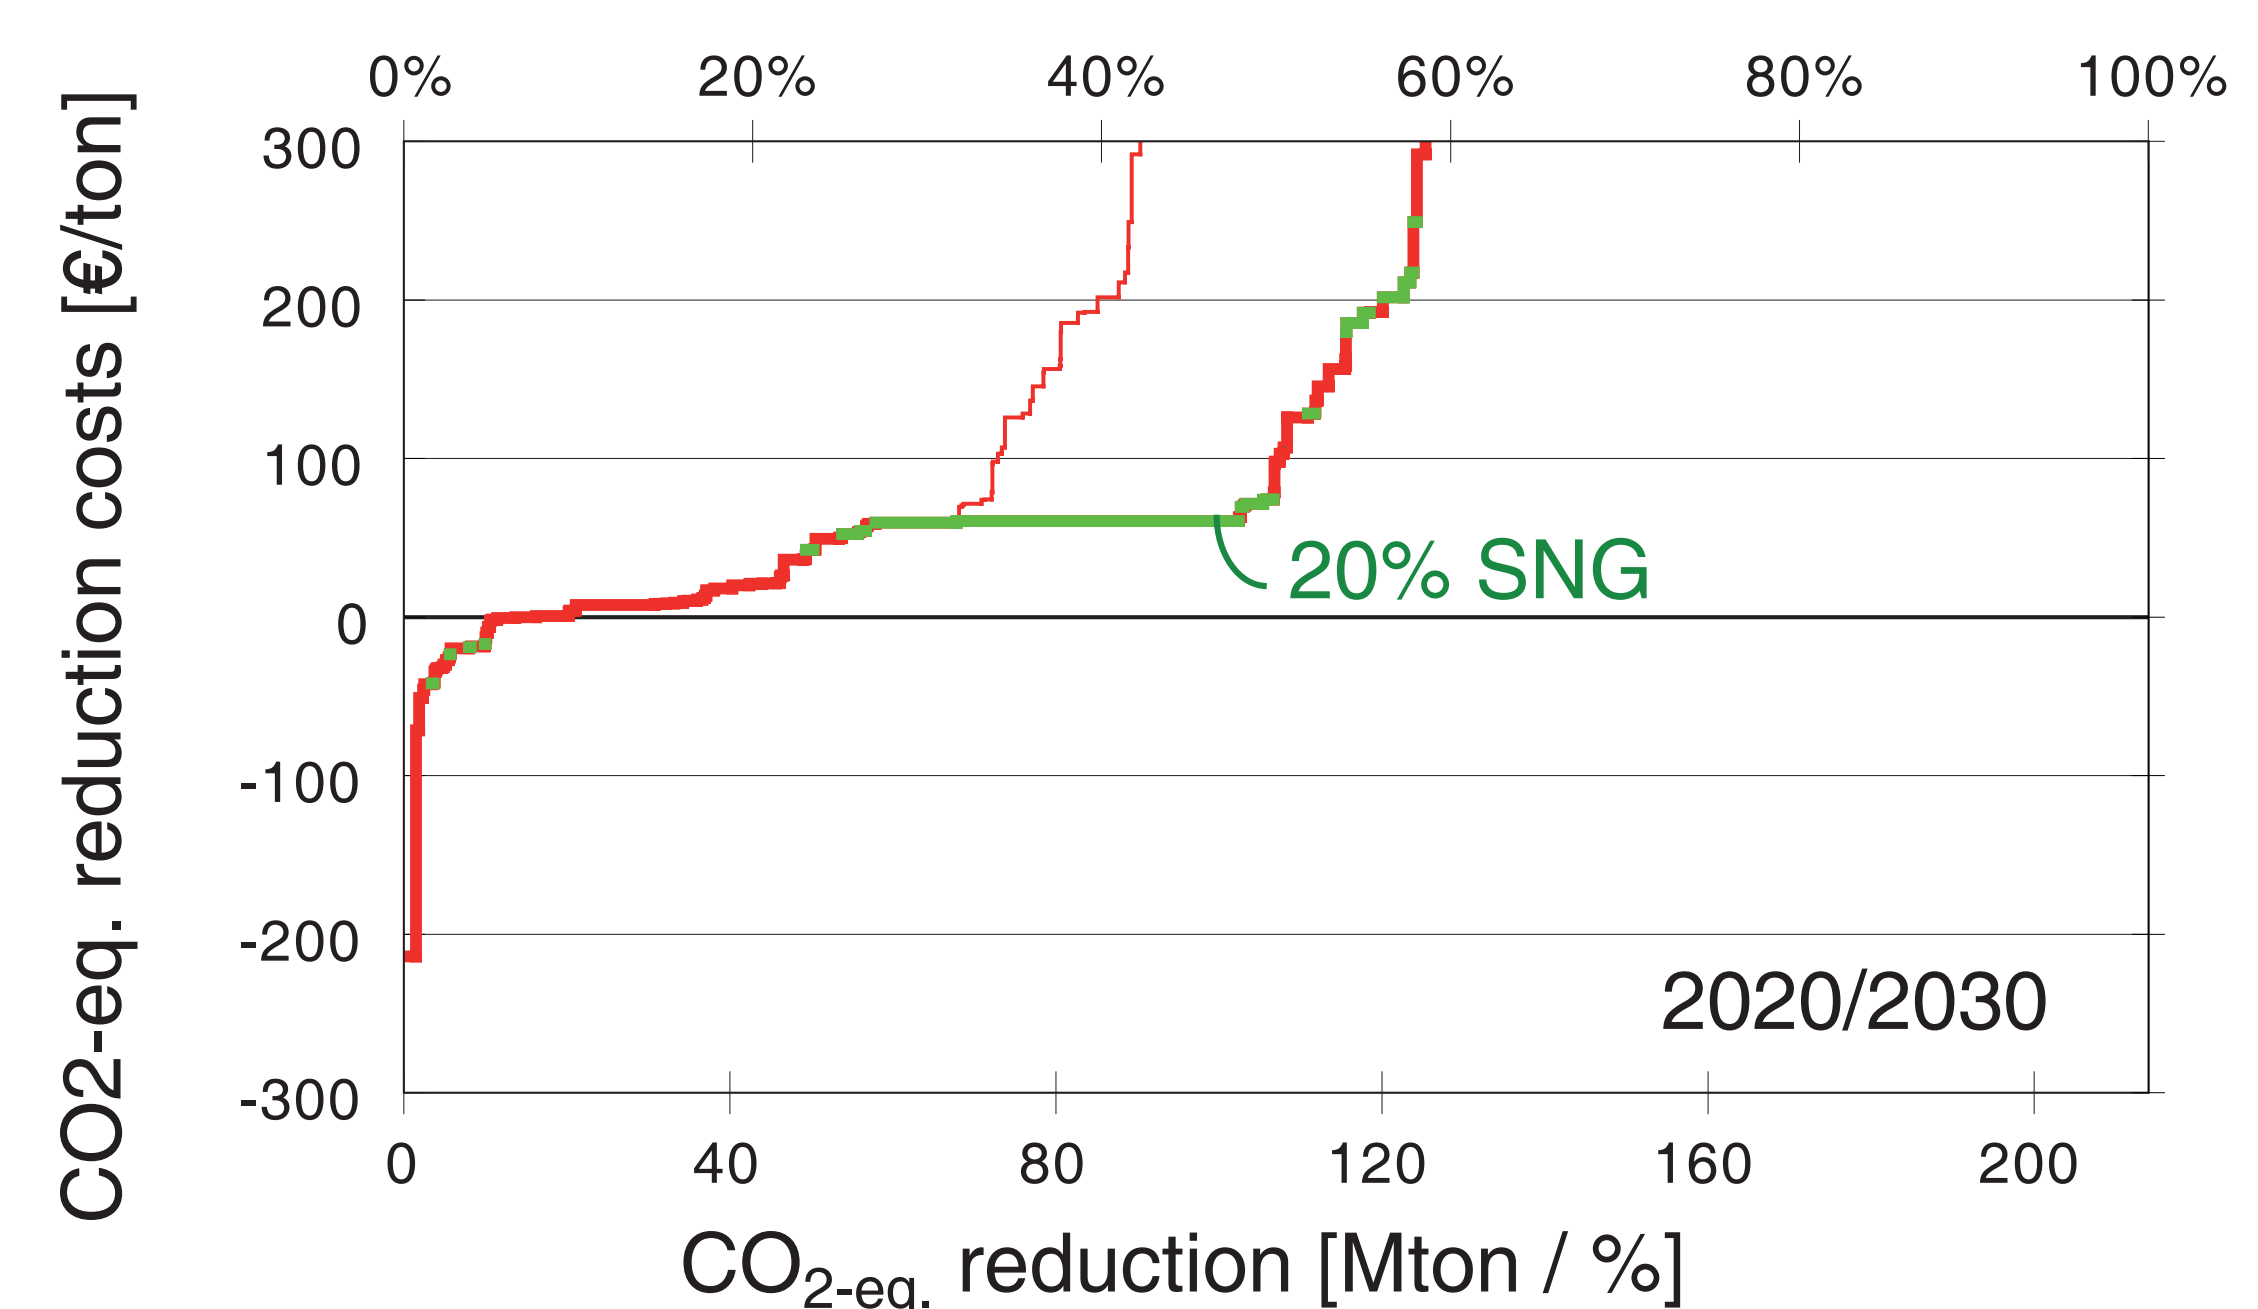

Nuclear power plants

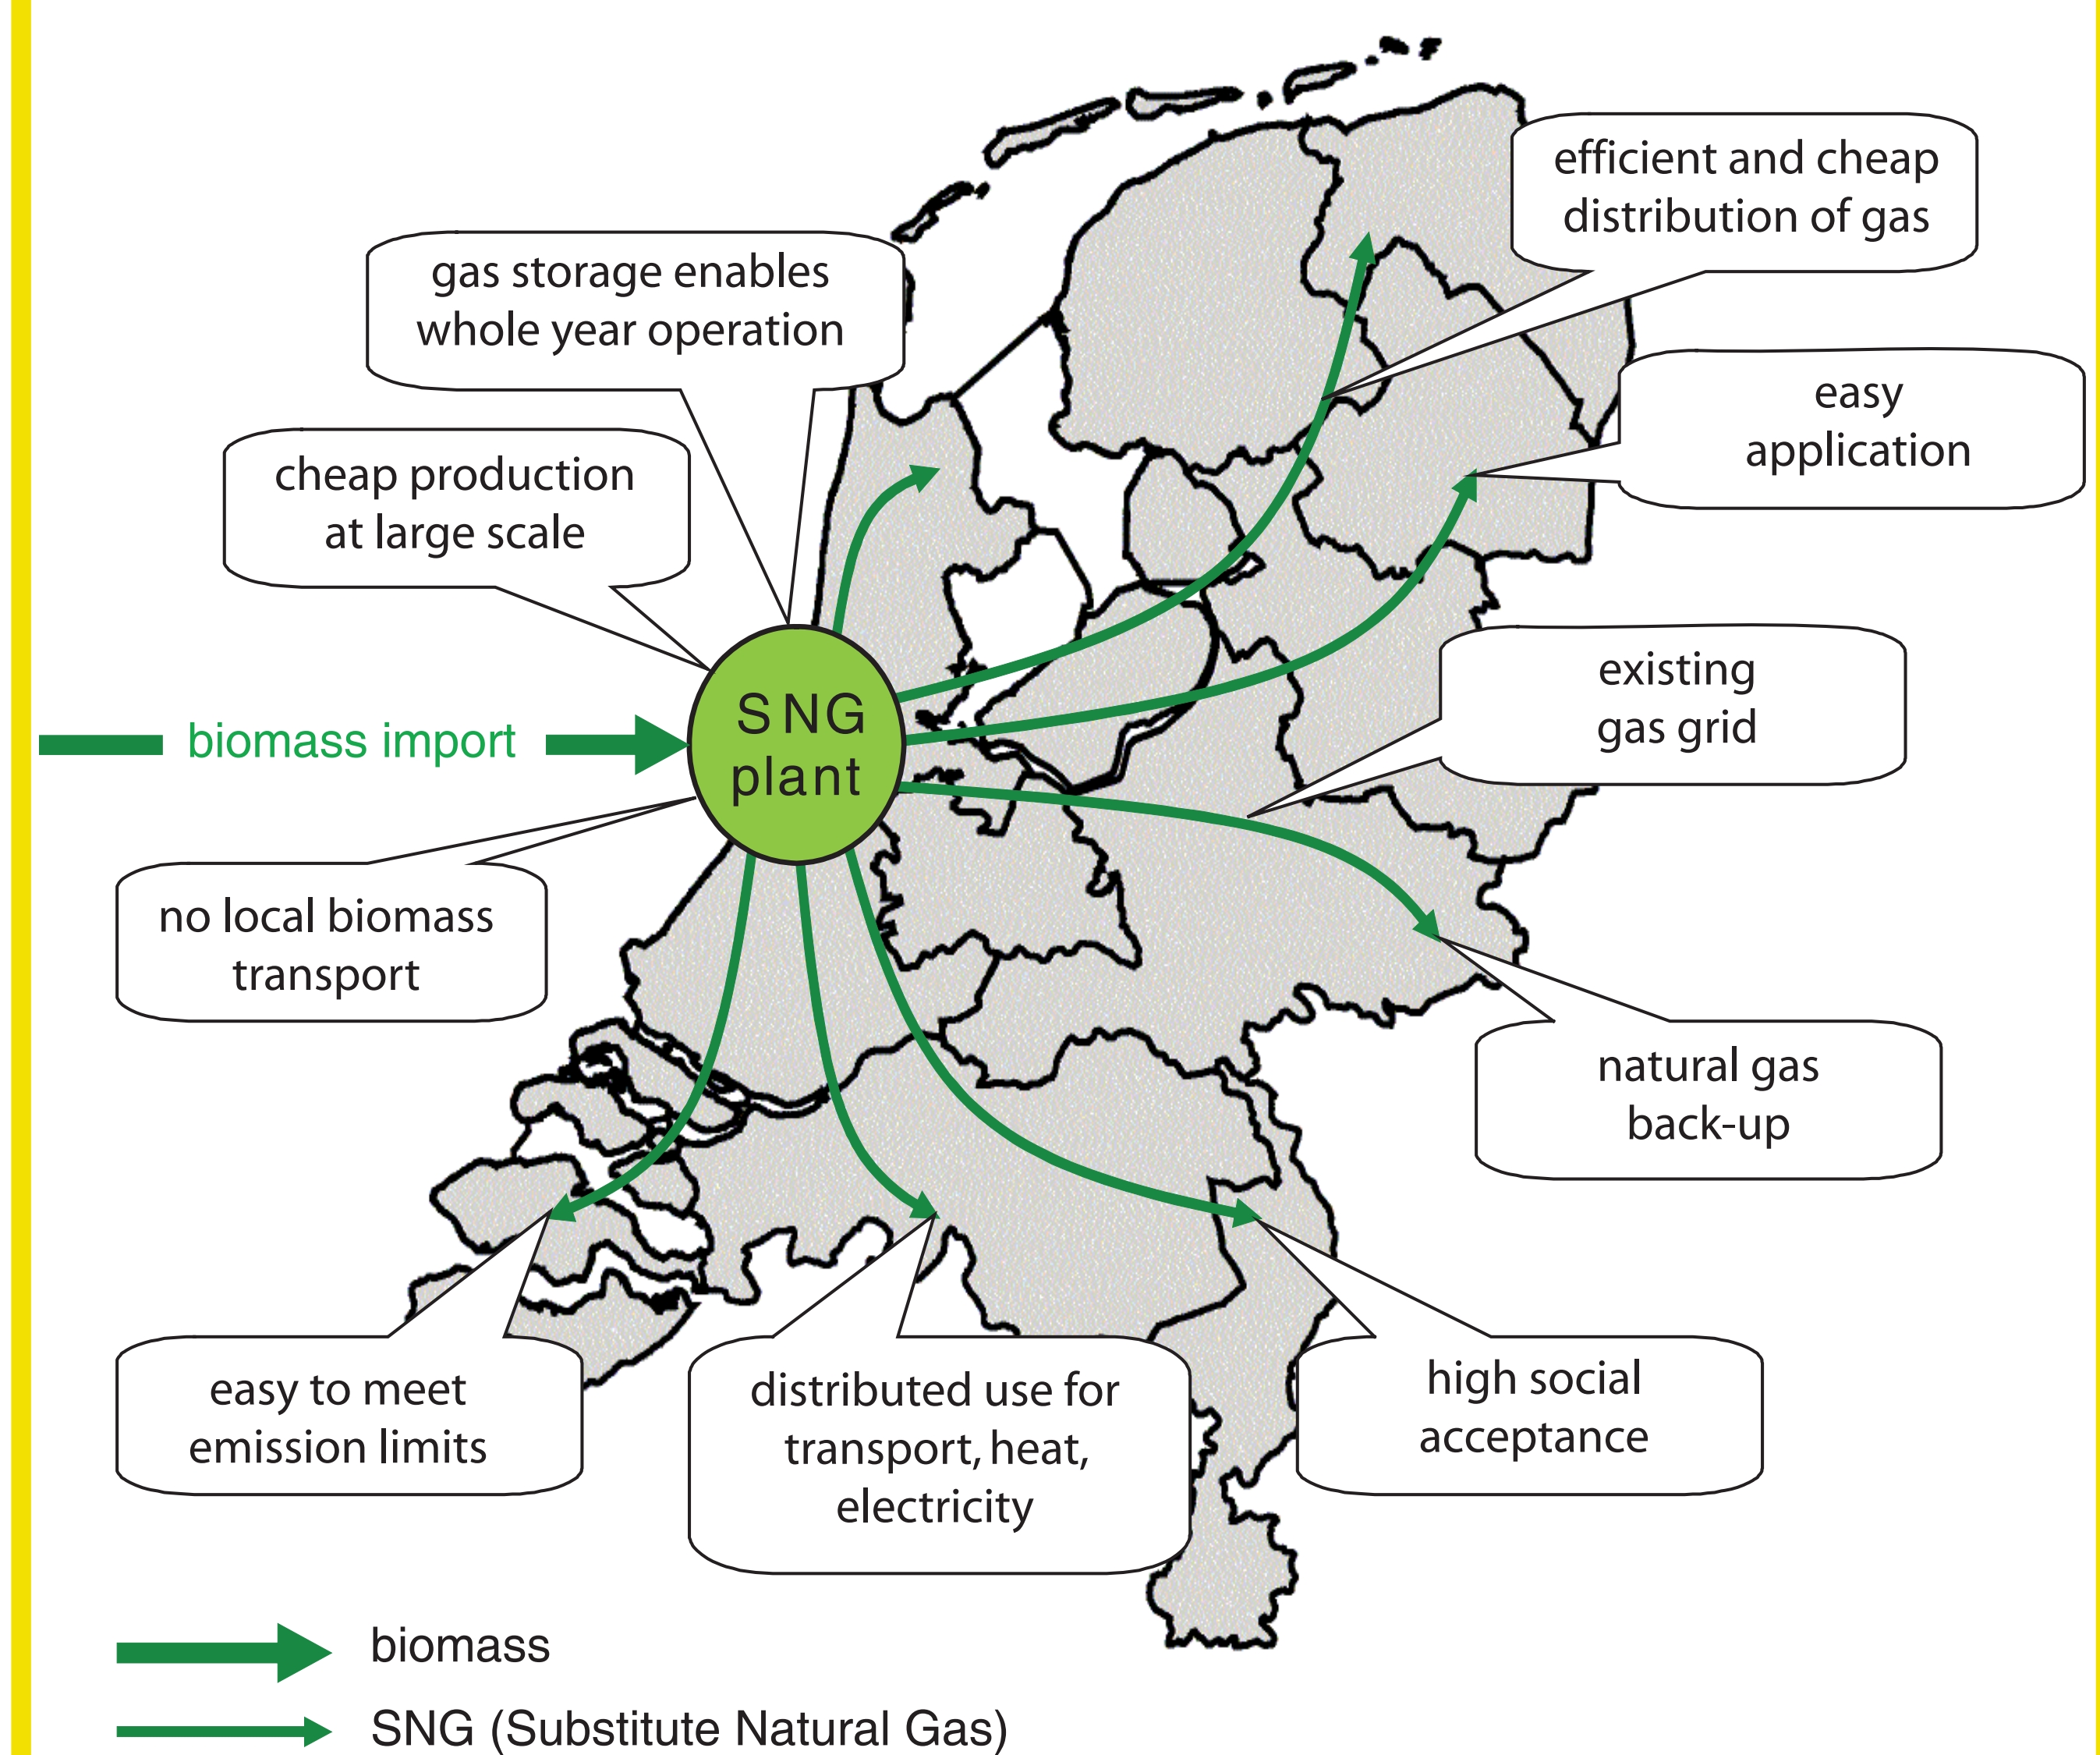

CO₂ storage

With SNG!

SNG has relatively low costs, a large CO₂ reduction potential and many practical advantages
